ELECTRONIC LOCKERS

smartecarte

SL–3000 ELECTRONIC LOCKERS

- Customize your locker service to fit the needs of your facility with the flexibility to choose from 12 *proven* operating modes. Options include single entry or multiple entry; which allows guest unlimited access to their belongings with one rental payment.

- Keyless system utilizes computer-generated code or user-generated code for locker access.

- Accepts bills, coins/tokens, and credit cards and returns change.

- 10.4 inch (26 cm) color touch-screen display provides instructions in 12 languages.

- Computerized operating efficiencies provide a reduction in labor and maintenance costs, and the ability to detect and enforce overdue lockers.

- Rented doors lock automatically if left unattended, and each door includes an active alarm system for maximum security.

- Biometric (finger print) readers available for extra security.

- Language: 16 languages supported with display of 12 at one time.

- Reporting includes: revenue, usage and performance.

- Customizable welcome screen includes advertising capability.

- Multi-day rental option is popular with ski resort guests.

- Concession and lease options available.

With several proven operating modes, Smarte Locke has the locker solution that is right for your facility.
